## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

*Drawings/Specification*

1. The drawings/specification are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "1111" and "1121" have both been used to designate first component. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

*Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. <sup>1-2, 4 and 8-10 are</sup> Claims 1- rejected under 35 U.S.C. 102(b) as being anticipated by Tellam et al (US 5,523,876).

Regarding claim 1, which is representative of claims 8-10, Tellam teaches of a driving device for a module, comprising: a first rigid frame 2006; a second rigid frame 2008; an active gear wheel 2014 disposed on said first rigid frame; a passive gear wheel 2010 disposed on said second rigid frame; a driving belt 1910 engaged with said active gear wheel and said passive gear wheel; a rigid component 1930 having a first end and second end, said first end being affixed to said first rigid frame, said second end including a vertical surface and being connected to said second rigid frame; and an elastic 1924 component having a first end and a second end, said first end being in contact with the vertical surface

Art Unit: 2622

of said second end of said rigid component; said elastic component sleeving said second end of said rigid component; wherein said elastic component interacts with said second rigid frame to allow said second rigid frame to move along the axis of said rigid component within a predetermined distance when required to adjust the tension of said driving belt (Col 16 Lines 12-47).

Considering claim 2, Tellam teaches wherein said elastic component 1924 is a spring (Col 16 Lines 11-26).

Considering claim 4, Tellam discloses wherein said module 220 movably connects to said rigid frame (Col 16 Lines 11-17).

***Allowable Subject Matter***

4. Claims 3,5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Heather D Gibbs whose telephone number is 703-306-4152. The examiner can normally be reached on M-F 8AM-4PM.
